2007 Chevrolet HHR LS I really like the styling inside and out. I bought it used with over 200,000 miles on it and has 1 dash light but it is for emissions. It has a smooth ride. The turn signal indicator has to be held down or manually released but it works. The window motor in one of rear windows burnt out and is stuck open/down.

The 2007 Chevrolet HHR is a compact, 4-door wagon. The 2007 Chevrolet HHR (which is a carryover from 2006) comes in three trims; LS, LT1, and LT2. The HHR LS has a 2.2-L, I4, 149-hp engine; the HHR LT2 has a 2.4L, I4, 175-hp engine. Both of the HHR trims come with a 5-speed manual transmission with and optional 4-speed automatic.

While Canadians are proud of their healthcare system, the reality is that it is fragmented and disorganized. Instead of a pan-Canadian system, it is a "system of systems" - thirteen provincial and territorial systems and a federal system. As a result, Canadian healthcare has not only become one of the costliest in the world, but is falling well behind many developed countries in terms of quality. Canadians increasingly realize that their healthcare system is no longer fiscally sustainable, yet change remains elusive. The standard claim is that Canada's multijurisdictional approach makes system-wide reform nearly impossible. Toward a Healthcare Strategy for Canadians disputes this reasoning, making the case for a comprehensive, system-wide, made-in-Canada healthcare strategy. It looks at the mechanics of change and suggests ways in which the various participants in the system - governments, healthcare

professionals, the private sector, and patients - can work collaboratively to transform a second-rate system. Addressing critical issues of health human resources, electronic health records, integrated care, and pharmacare, *Toward a Healthcare Strategy for Canadians* shows how a system-wide strategic approach to this crucial policy area can make a difference in Canada's healthcare system in the future.

How society's undervaluing of life puts all of us at risk--and the groundbreaking economic measure that can fix it Like it or not, sometimes we need to put a monetary value on people's lives. In the past, government agencies used the financial "cost of death" to monetize the mortality risks of regulatory policies, but this method vastly undervalued life. *Pricing Lives* tells the story of how the government came to adopt an altogether different approach--the value of a statistical life, or VSL--and persuasively shows how its more widespread use could create a safer and more equitable society for everyone. In the 1980s, W. Kip Viscusi used the method to demonstrate that the benefits of requiring businesses to label hazardous chemicals immensely outweighed the costs. VSL is the risk-reward trade-off that people make about their health when considering risky job choices. With it, Viscusi calculated how much more money workers would demand to take on hazardous jobs, boosting calculated benefits by an order of magnitude. His current estimate of the value of a statistical life is \$10 million. In this book, Viscusi provides a comprehensive look at all aspects of economic and policy efforts to price lives, including controversial topics such as whether older people's lives are worth less and richer people's lives are worth more. He explains why corporations need to abandon the misguided cost-of-death approach, how the courts can profit from increased application of VSL in assessing liability and setting damages, and how other countries consistently undervalue risks to life. *Pricing Lives* proposes sensible economic guideposts to foster more protective policies and greater levels of safety in the United States and throughout the world.

With increasing demands for evidence-based decision-making, the academic community must be ready to train researchers who can reduce the gap between health care research and practice. One program dedicated to promoting such training is the Canadian Health Services Research Foundation (CHSRF, now the Canadian Foundation for Healthcare Improvement) and Canadian Institutes for Health Research (CIHR) Chair Program. Participants of these programs were selected to develop innovative research programs that bridge this divide, as well as to mentor the next generation on building partnerships with organizations outside the university through applied research. The CHSRF/CIHR Chairs have come together in *Shaping Academia for the Public Good* to draw out valuable lessons learned throughout its first decade. It includes chapters on funding, knowledge transfer, policy frameworks, working with multiple stakeholders, and managing organizational settings, among other topics. *Shaping Academia for the Public Good* will be a helpful resource for those interested in the potential of new research approaches to improve our healthcare system.

The recent Chaoulli Supreme Court decision and health care proposals by Quebec and Alberta have led to renewed debate on how best to restructure the Canadian health care system. This volume offers a timely analysis of access and wait-times, alternative modes of health care delivery, and funding methods from the perspective of evidence-based policy making.

Millennium development goals (MDGs) and sustainable development goals (SDGs) have significant implications for global development, in particular for African countries. This book seeks to assist Africa's policy makers and political leaders, MNCs and NGOs, plus its increasingly heterogeneous media landscape, to understand and better respond or negotiate the evolving development environment of the 21st century. In this collection of nuanced essays, the contributors interrogate the relationship between the MDGs and SDGs in key areas of African development to enhance our understanding and knowledge of the evolving nature of development. They address issues of governance, agriculture, south-south cooperation in a context of foreign aid, natural resource governance and sustainable development, export diversification and economic growth as well as emerging topics such as the internet of things or the sharing economy, climate change, conflict and non-traditional security. The varied, yet interlinked foci present a holistic overview of Africa's development aspirations, and ability to transform the SDGs' universal aspirations into local realities. This book will be of use to academics and students in Development Studies, Contemporary African Studies, Political Science, Policy Studies and Geography, and should also appeal to policy makers and development practitioners.

An authoritative, state-of-the-art collection that brings together key experts to provide an overview of the field. This new paperback edition includes 3 new chapters on human resources and health, end-of-life care and complementary and alternative medicine as well as thorough updates to the introduction and conclusion.

Examining a shocking array of fraud, corruption, theft, and embezzlement cases, this vivid collection reveals the practice of detecting, investigating, prosecuting, defending, and resolving white-collar crimes. Each chapter is a case study of an illustrative criminal case and draws on extensive public records around both obscure and high-profile crimes of the powerful, such as money laundering, mortgage fraud, public corruption, securities fraud, environmental crimes, and Ponzi schemes. Organized around a consistent analytic framework, each case tells a unique story and provides an engaging introduction to these complex crimes, while also introducing students to the practical aspects of investigation and prosecution of white-collar offenses. Jennifer C. Noble's text takes students to the front lines of these vastly understudied crimes, preparing them for future practice and policy work.

Named a 2013 Doody's Core Title! 2011 AJN Book of the Year Winner in Nursing Research! "This is a much needed addition to nursing's arsenal of policy books. It is the first to really examine the need for scientific evidence to underpin policy. The two editors are pioneers in research and have led nursing research to new levels. It is fitting they do the same in underscoring the important role nurses have in using their programs of research to develop policy agendas." Score: 94, 4 stars --Doody's A must-read for health care policy makers, as well as nursing students, faculty, and professionals, this groundbreaking text provides actual strategies for translating nursing research to health policy at all levels of policy-making. The

editors, both leaders in nursing research, provide key findings from research programs that have positively influenced health policy decisions and programs at community, state, national, and international levels. The first compilation of information linking health policy and nursing research, this text presents perspectives and frameworks for understanding the processes bridging research and health policy; multiple factors influencing the processes; and actual examples of National Institute of Nursing Research (NINR)-funded research that has influenced health policy programs. Key Features: Examples of NINR-funded research that has been used at all levels to influence health policy, including settings, populations, and age spectrums Models and strategies for linking research and health policy Lessons learned from pioneer nurse scientists who have shaped health policy with nursing research Recommendations for improving nurses' work environments for better patient outcomes

Now that Ottawa has left health care to the provinces, what is the future for Canadian health care in a decentralized federal context? Is the Canada Health Act dead? Health Care Federalism in Canada provides a multi-perspective, interdisciplinary analysis of a critical juncture in Canadian public policy and the contributing factors which have led to this point. Social scientists, legal scholars, health services researchers, and decision-makers examine the shift from a system where Ottawa has played a significant, sometimes controversial role, to one where provinces have more ability to push health care design in new directions. Will this change inspire innovation and collaboration, or inequality and confusion? Providing an up-to-date analysis of health care policy and intergovernmental relations at a crucial time, Health Care Federalism in Canada will be of interest to anyone concerned with the current dynamics and future potential of Canadian health care. Contributors include Greg Marchildon (Canada Research Chair at the Johnson-Shoyama Graduate School of Public Policy in Saskatchewan), Ken Boessenkool (public affairs strategist and former political advisor to Stephen Harper), Adrian Levy (Professor and Head, Department of Community Health and Epidemiology at Dalhousie University), Boris Sobolev (Canada Research Chair at the School of Public and Population Health, University of British Columbia), Gail Tomblin Murphy (Director, WHO Collaborating Centre for Health Workforce Planning and Research), and David Haardt (Department of Economics, Dalhousie University).
