Wired and wireless networks. Networking computers brings many benefits to users. Without networking, many computing applications would not be possible. Part of. Computer Science.

Networks—Wired-and-wireless-networks—OCR—GCSE

Computer networks for the home and small business use either wired or wireless technology. Wired Ethernet was once the common choice for homes and businesses. However, Wi-Fi and other wireless options are now prevalent in homes, while many businesses still rely on wired networks. Both methods have advantages over each other, and both represent viable options for home and other local area ...

Wired-vs.-Wireless-Networking—Lifewire

Wired Network As we know "wired" is the term refers to any physical medium consisting of cables. The cables can be copper wire, twisted pair or fiber optic. Wired network is used to carry different forms of electrical signals from one end to the other.
