Though once upon a time coffee may have been a symbol of wealth and global interactions, today our coffee culture seems to emphasize the local. Drawing on one of the most enduring aspects of coffee culture as a metaphor of non-conformism, the appeal of global coffee corporations isn't what it used to be.

This book explores the impact in Japan of the rise of global coffee chains and the associated coffee culture. Based on extensive original research, the book discusses the cultural context of Japan, where tea-drinking has been culturally important, reports on the emergence of the new coffee shop consumer experience, and reflects on the link between consumption and identity, on cultural fantasies about modern, Western, or global lifestyles, on the effects of global standardization, and on much more.

Coffee Culture: hot coffee + cool spaces is a full-color presentation of coffee shops crafting great coffee in interesting spaces with good design aesthetics. The author has selected thirty-three coffee shops located in cities across the United States, including Ann Arbor, Chicago, Denver, Los Angeles, Minneapolis, New York, Oakland, Philadelphia, Portland, San Francisco, Santa Cruz, and Seattle. Photography by an eclectic group of photographers captures the feel and personality of each coffee shop. The concept of space is often extended from the shop interior to the neighborhood—interweaving coffee, art, architecture, design, and historic preservation. The book showcases coffee shops located in historic buildings, modern architecture, an art museum, an arcade, a courtyard, a former loading dock and even a reclaimed cargo shipping container—but the common thread is an appreciation for great coffee in spaces that invite human interaction and create memories through good design.

Aspects of global coffee culture are explored as they relate to the settings where the beverage is produced, prepared and consumed as part of coffee related tourism. Of particular note on the one hand is the potential of such tourism for developing tourism destinations, products and experiences; while on the other hand improving the livelihoods of coffee producers.

Coffee: A Comprehensive Guide to the Bean, the Beverage, and the Industry offers a definitive guide to the many rich dimensions of the bean and the beverage around the world. Leading experts from business and academia consider coffee's history, global spread, cultivation, preparation, marketing, and the environmental and social issues surrounding it today. They discuss, for example, the impact of globalization; the many definitions of organic, direct trade, and fair trade; the health of female farmers; the relationships among shade, birds, and coffee; roasting as an art and a science; and where profits are made in the commodity chain. Drawing on interviews and the lives of people working in the business—from pickers and roasters to coffee bar owners and consumers—this book brings a compelling human side to the story. The authors avoid romanticizing or demonizing any group in the business. They consider basic but widely misunderstood issues such as who adds value to the bean, the constraints of peasant life, and the impact of climate change. Moving beyond simple answers, they represent various participants

in the supply chain and a range of opinions about problems and suggested solutions in the industry. Coffee offers a multidimensional examination of a deceptively everyday but extremely complex commodity that remains at the center of many millions of lives. Tracing coffee's journey from field to cup, this handbook to one of the world's favorite beverages is an essential guide for professionals, coffee lovers, and students alike. Anthropology and Egalitarianism is an artful and accessible introduction to key themes in cultural anthropology. Writing in a deeply personal style and using material from his fieldwork in three dramatically different locales -- Indonesia, West Africa, and Monticello, the historic home of Thomas Jefferson -- Eric Gable shows why the ethnographic encounter is the core of the discipline's method and the basis of its unique contribution to understanding the human condition. Gable weaves together vignettes from the field and discussion of major works as he explores the development of the idea of culture through the experience of cultural contrast, anthropology's fraught relationship to racism and colonialism, and other enduring themes.

A myth-shattering investigation of the true cost of America's passion for finding a better bargain From the shuttered factories of the Rust Belt to the strip malls of the Sun Belt-and almost everywhere in between-America has been transformed by its relentless fixation on low price. This pervasive yet little- examined obsession with bargains is arguably the most powerful and devastating market force of our time, having fueled an excess of consumerism that blights our landscapes, escalates personal debt, lowers our standard of living, and even skews of our concept of time. Spotlighting the peculiar forces that drove Americans away from quality, durability, and craftsmanship and towards quantity, quantity, and more quantity, Ellen Ruppel Shell traces the rise of the bargain through our current big-box profusion to expose the astronomically high cost of cheap.

This book by Andrew P. Miller, examines the role of ecotourism in Costa Rica and the way in which it intersects with policies to attract foreign direct investment. This authoritative exploration is essential for students and scholars interested in Latin American politics and history, development studies, and environmental sustainability.
