The book explores the developing challenges and opportunities within the business and finance world which are likely to impact the accounting profession in the near future. It outlines a number of approaches to ensure that the accountants of the future are equipped with a useful awareness of some of the key topic areas that are quickly becoming a reality and helps bridge the gap between academia and practice. The chapters are standalone introductory pieces to provide useful précis of key topics and how they apply to the accounting profession in particular. It aims to deliver key readings on 'hot topics' not addressed in other texts which the accounting profession is tackling or are likely to tackle soon. Hence the book provides accounting students and researchers a solid grounding in a broad range of highly relevant non-technical accounting themes, looking at the bigger environment in which future accountants will be operating, involving considerations of strategic corporate governance issues and highlighting competences beyond the standard technical accounting skill sets.

Contemporary Issues in Accounting 2nd Edition is suited to a wide range of courses, particularly relevant to advanced financial accounting subjects at both an undergraduate and postgraduate level. It considers a broad range of financial accounting issues facing contemporary businesses from a range of perspectives, including appropriate theories and research findings. The 2nd edition examines the regulatory setting within which accounting operates from the context of the process of standard setting and the Conceptual Framework. Within this framework one of the most controversial areas of accounting - measurement - is examined in detail. Alternative measurement choices are considered, with intangibles and sustainability reporting being examined in more detail as they are areas with unique measurement challenges. With the increasing use of fair value measurement, we present a comprehensive analysis of this measurement basis, including its application in specific contexts.

Explores advanced accounting concepts & policies by applying them to a range of contemporary accounting issues. Authors: Rankin, Monash University & previously RMIT & University of Southern Queensland; Stanton, University of Newcastle; McGowan, University of South Australia; Ferlauto, University of Western Sydney; Tilling, University of Notre Dame.

Contemporary Issues in Accounting Regulation looks at accounting regulation in a different way. The opening chapters explore the tension between the power of the state and the forces of the market, and other aspects of the political dimension to accounting regulation. The book also examines the process of setting accounting standards, highlighting the crucial role of standard setters in assessing the level of public support for an issue in the face of opposing positions taken by powerful interest groups. In addition, the book provides an introduction to the theoretical framework of accounting regulation, looking at choices between controversial accounting methods and at markets that are characterized by asymmetry of information and beliefs. The final chapters of the book are concerned with creative accounting, deregulation of financial reporting by smaller companies, and the link between price regulation and accounting policy choices.

This volume draws together contemporary topics, themes and methodologies in the field of sustainability reporting and assurance to reveal how sustainability information is actually used, interpreted and processed by internal and external users.

"We are pleased to offer you with the following book titled "Contemporary Issues in Finance, Accounting and Consumers' Behaviour: Lesson From Indonesia" written by prominent authors who are specialized in the area from the Faculty of Economics and Business, Universitas Indonesia, and other top-ranked universities in Indonesia. The book covers some most recent studies and updated issues in the following areas: 1. Corporate Finance, Governance and Social Responsibility: The articles in this chapter discuss recent issues related with corporate financial management in various contexts, including risk management, risk-taking behaviour, CSR as both an antecedent and a consequence, as well as recent issues in accounting like carbon emission disclosure. 2. Auditing and Accounting Education: This chapters contains articles that analyze how earning management practice could be minimized, how risk-based internal audit could affect credit process, how settlement of government losses is practiced in central government institution, IFRS convergence and discussions on what motivates students to become accounting educators. 3. Islamic Economics and Consumer Behavior: Some issues discussed by the articles in this chapter include Islamic microfinance and women's empowerment, intention to purchase various products and services (e.g. halal personal care products, commercial airline services, motorcycle, muslim fashions, etc.), zakat as a tax deduction and its influence on tax compliance and spirituality in the workplace. This book is strongly recommended to be used as a reference for researchers, students and also business practitioners not only in Indonesia, but also wider audiences that required deeper insights/thoughts in dynamic, changing and global emerging market (i.e. in Indonesia)"--

With the collapse of Enron and other similar scandals, financial reporting and its relation to corporate governance has become a contentious issue. In this revealing book, author Paul Rosenfield involves the reader in exploring contemporary financial reporting and skilfully highlights the deficiencies in current methods. In doing so it provides a user-oriented guide to the salient issues which affect all aspects of financial accounting. Contemporary Issues in Financial Reporting challenges the reader to critically think through the issues and arguments involved in the practice of financial reporting. It goes to the heart of the most difficult and controversial problems, investigating the major issues and commenting upon the solutions offered in financial reporting literature. The grave defects in current accepted accounting principles are demonstrated and exposed, and alternative solutions are offered. Written by a former Secretary General of the International Accounting Standards Committee, practitioners and accounting scholars alike will find this volume to be an essential addition to their libraries.

Providing a comprehensive account which brings a wide range of countries to the forefront in terms of both comparability and accountability, this study shines a light on the differences in accounting systems between states, and fills a gap in the literature by combining these aspects of public sector accounting and auditing within a single book.

Other chapters deal with newly emerging concerns in management accounting, including network relations, integrated cost management systems, knowledge management pursuits, environmental management accounting, and accounting and digitisation. Each chapter encompasses discussions of basic premises complemented by insights from modern day practice, research and thought. This makes the book particularly suitable for students in intermediate, advanced and executive level courses in management accounting. It also provides an extensive corpus of discussions, which will inform those in practice. Readers interested in gaining direct insights into specialised management accounting areas will find this book to be an especially valuable reference source
