Of Phylum Arthropoda

Arthropods are a popular source of foods to humans and also have other ecological roles.

Some common arthropods that are good sources of food are crustaceans such as crabs and prawns. The arthropod class of animals includes insects, which also have important ecological

Economic

and economic roles.

Because crustaceans are a popular source of food in many parts of the world, many people depend on fishing for them and selling them in order to make an income.

Economic importance of

Phylum Arthropoda.

There is a war between  
man and insects for food

and space (place of  
living). Insects

attack man, his domestic  
animals, and his crops.

They cause a large  
number of diseases in  
them. They destroy the

Economic Importance Of  
of Insects - Biology  
Discussion

Many plants rely on  
insect pollinators.

Pollination is the  
process of moving the  
plants' pollen from the  
male parts of the plant  
to the female parts; this  
process is how the  
plants reproduce. Plants  
of economic importance  
that are pollinated by
