Citizenship of the Union and Freedom of Movement of Persons, sets out to analyse in detail the various provisions of Community law which confer upon individuals the right to move about, reside and work in the Member States. It also examines the procedural safeguards which set those fundamental rights apart from any deriving from other international bodies or organisations and point up the originality of the Community system. Citizenship of the Union entails freedom of movement under the current Treaties and also under the Treaty of Lisbon, in which the unified treatment of the rules, by contrast with the existing pillars of Community and European Union law, might be expected to confer new impetus on the realisation of the area of freedom, security and justice. If there is truly to be such an area, there must be unified, not merely coordinated action. Judicial cooperation must be tightened in favour of the Union and, more importantly, individuals, be they Community citizens or indeed nationals of third countries, given the increasing trend towards a kind of integration which focuses less on formal data such as nationality and more on factors such as residence, employment and social integration. The book pays particular attention to this last

aspect and its political and legal implications. The "communitarisation" of immigration policy (the new Title IV of the EC Treaty mentioned above) and the perspectives opened up by the enlargement to 27 Member States (and more) and by the Treaty of Lisbon, provide the framework for the treatment given in the present work.

Mystery crime fiction written in the Golden Age of Murder "The intricacies of the characters' relationships and the trove of secrets Scotland Yard Inspector Macdonald uncovers make for riveting reading." -Booklist Bruce Attleton dazzled London's literary scene with his first two novels—but his early promise did not bear fruit. His wife Sybilla is a glittering actress, unforgiving of Bruce's failure, and the couple lead separate lives in their house at Regent's Park. When Bruce is called away on a sudden trip to Paris, he vanishes completely—until his suitcase and passport are found in a sinister artist's studio, the Belfry, in a crumbling house in Notting Hill. Inspector Macdonald must uncover Bruce's secrets, and find out the identity of his mysterious blackmailer. This intricate mystery from a classic writer is set in a superbly evoked London of the 1930s.

Offering a comprehensive analysis of the EU law covering crime, policing, civil co-operation, immigration, and asylum, this third edition of EU Justice and Home Affairs Law has been fully updated to take into account the changes effected by the Lisbon Treaty and recent case law and legislation.

This EDiR guide has a practical rather than a theoretical focus, and is intended as a reference tool for potential EDiR candidates who would like to gain a better understanding of the EDiR examination. A pool of experts has made every possible effort to create a single source that contains everything needed to successfully pass the EDiR examination. Times have changed, and there is certainly a new generation of radiologists who will find this cutting-edge tool a "must-have" to familiarize themselves with the examination quickly and easily. The book is divided into the following main sections: one chapter for each subspecialty; one chapter on Safety, Management and Imaging Procedures; another on Principles of Imaging Techniques and Processing; and lastly, one on Management. This structure follows the same pattern as the EDiR examination, which is based on the European Training Curriculum (ETC) for Radiology released by the European Society of Radiology (ESR). Each subspecialty is covered using the

same basic structure: Multiple Response Questions (MRQs), Short Cases (SCs) and CORE Cases from one of the most recent EDiR examinations. Students will thus be able to see all the questions from a recent examination and learn from the answers and comments provided by our pool of experts. Clinical cases as electronic supplementary material complete the book, and links to EDiR preparation sessions are also included, allowing students to improve their knowledge of specific areas.

EU Asylum and Immigration Law examines in detail the EU legislation and case law on the issues of immigration, asylum, visas and border controls, discussing the impact and ongoing development of EU law in these complex and controversial areas. The updated edition particularly covers new EU legislation, case law, and operational developments since 2010 on: internal border checks; external border controls; visa lists; litigation to obtain a visa; the Schengen Information System; the Visa Information System; family reunion; non-EU students; long-term residents; all aspects of refugee law (including the definition of 'refugee' and subsidiarity protection, the rights of asylum-seekers, and Member States' responsibility for asylum-seekers); and irregular migrants' rights. It also covers the institutional framework for these issues, the related human rights

aspects, and the connections with other areas of EU law, like the free movement of EU citizens. Steve Peers' seminal text on the justice and home affairs law of the European Union appears in its fourth edition and is now available in two separate volumes covering asylum and immigration law, and criminal law, policing, and civil law, and as a two-volume set. It provides a detailed examination of EU legislation and case law on the issues of immigration, asylum, visas, border controls, and police and criminal law cooperation, discussing the impact and ongoing development of EU law. This edition is the definitive guide to these intricate, contentious, and fast-developing areas of EU law, and will be invaluable to scholars, practitioners, and students in the field.

This work provides a detailed analysis of each provision of European Law that bears on free movement of persons and shows how the provisions have been interpreted by the European Court of Justice.

This book is based on the doctoral thesis which the author prepared and defended at the European University Institute in Florence. Following the adoption of the Treaty on European Union, the concept of Community or Union citizenship has been the subject of widespread academic and political debate. Part I of this book provides a

framework within which to examine the concept of Community or Union citizenship. It distinguishes nationality and citizenship, discusses the importance of Member State nationality for both free movement of persons in the European Community and Union citizenship and, finally, examines the traditional requirement in Community law of involvement in an economic activity. Part II focuses on the relationship between the principle of equal treatment and Union citizenship, given the fact that many of the rights conferred on Union citizens are simply extended to them on the basis of the principle of equal treatment. Finally, Part III looks beyond equal treatment and questions whether a direct relationship can be said to exist between Union citizens and the Union. It also suggests some of the issues relevant to citizenship which may feature at the forthcoming Intergovernmental Conference in 1996. The overall objective of the book is to discuss whether citizenship is an appropriate description of the rights which Union citizens enjoy on the basis of Community law or the duties to which they may become subject.

This book provides a comprehensive article by article commentary of the EU's Citizenship Directive. In doing so it offers readers a "one-stop" guide to a fundamental Union legislative act that governs the right of Union citizens and their family members to travel to or take up residence in other Member States of their choosing.
