On the edge of the Arctic Ocean, above the Arctic Circle, the prehistoric settlements at Point Hope, Alaska, represent a truly remarkable accomplishment in human biological and cultural adaptations. Presenting a set of anthropological analyses on the human skeletal remains and cultural material from the Ipiutak and Tigara archaeological sites, *The Foragers of Point Hope* sheds new light on the excavations from 1939-41, which provided one of the largest sets of combined biological and cultural materials of northern latitude peoples in the world. A range of material items indicated successful human foraging strategies in this harsh Arctic environment. They also yielded enigmatic artifacts indicative of complex human cultural life filled with dense ritual and artistic expression. These remnants of past human activity contribute to a crucial understanding of past foraging lifeways and offer important insights into the human condition at the extreme edges of the globe.

"Leading the way describes how the men and women of Air Force civil engineering have provided the basing that enabled the Air Force to fly, fight, and win. This book depicts how engineers built hundreds of bases during World Wars I and II, Korea, Vietnam, the Gulf War, and Operations Enduring Freedom and Iraqi Freedom. At the same time, these engineers operated and maintained a global network of enduring, peacetime bases. It describes the engineers' role in special projects such as the ballistic missile program, the Arctic early warning sites, and construction of the U.S. Air Force Academy. Using hundreds of sources, this detailed narrative tells the story of how civil engineers have been organized, trained, equipped, and employed for more than 100 years. From the beaches of Normandy to the mountains of Afghanistan, civil engineers have forged an unmatched record of success and built a solid foundation for today's Air Force."--Back cover.

A unique A-to-Z reference of brilliance in innovation and invention Combining engagingly written, well-researched history with the respected imprimatur of *Scientific American* magazine, this authoritative, accessible reference provides a wide-ranging overview of the inventions, technological advances, and discoveries that have transformed human society throughout our history. More than 400 entertaining entries explain the details and significance of such varied breakthroughs as the development of agriculture, the "invention" of algebra, and the birth of the computer. Special chronological sections divide the entries, providing a unique focus on the intersection of science and technology from early human history to the present. In addition, each section is supplemented by primary source sidebars, which feature excerpts from scientists' diaries, contemporary accounts of new inventions, and various "In Their Own Words" sources. Comprehensive and thoroughly readable, *Scientific American Inventions and Discoveries* is an indispensable resource for anyone fascinated by the history of science and technology. Topics include: aerosol spray * algebra * Archimedes' Principle * barbed wire * canned food * carburetor * circulation of blood * condom * encryption machine * fork * fuel cell * latitude * music synthesizer * positron * radar * steel * television * traffic lights * Heisenberg's uncertainty principle

Males and females often differ in developmental patterns, adult morphology, ecology and behaviour, and in many mammals males are often larger. Size dimorphism results in divergent nutritional and energetic requirements or reproductive strategies by the sexes, which in turn sometimes causes them to select different forage, use different habitats, and express differing social affinities. Such divergent lifestyles often lead males and females to live large parts of their lives separately. Sexual segregation is widespread in animals. Males and females may share the same habitat, but at different times, for example, or they might use different habitats entirely. Why did sexual segregation evolve and what factors contribute to it? *Sexual Segregation in Vertebrates* explores these questions by looking at a wide range of vertebrates and is aimed as a synthesis of our current understanding and a guide for future research.

[Otis Moon is an] "intriguing noir thriller: the voice is assured, the period detail is perfect." -Kate Burke Miciak, vice president and executive editor, The Bantam Dell Publishing Group "Otis Moon is a witty and colorful protagonist, and the conceit of the mystery was fresh, but at the same time, enjoyable traditional." -E. Stacy Creamer, vice president and executive editor, The Doubleday Broadway Publishing Group "Otis Moon is a witty and colorful protagonist, and the conceit of the mystery was fresh, but at the same time, enjoyable traditional." -E. Stacy Creamer, vice president and executive editor, The Doubleday Broadway Publishing Group "The writing [in Otis Moon] is very good-I love how the noir is cut with a very subtle edge of humor." -Sarah Durand, senior editor, William Morrow

"A place here called Naw peu ooch eta cots from whence this river Derives its name..." When Hudson's Bay Company surveyor Peter Fidler made contact with the Ktunaxa at the Gap of the Oldman River in the winter of 1792, his Piikáni guides brought him to the river's namesake: these were the playing grounds where Napi, or Old Man, taught the various nations how to play a game as a way of making peace. In the centuries since, travellers, adventurers, and scholars have recorded several accounts of Old Man's Playing Ground and of the hoop-and-arrow game that was played there. These same stories continue to be told, demonstrating the site's core significance in the sacred geography of First Nations in southern Alberta today. In this work, oral tradition, history, and ethnography are brought together with a

geomorphic assessment of the playing ground's most probable location—a floodplain scoured and rebuilt by floodwaters of the Oldman—and the archaeology of adjacent prehistoric campsite D1Po-8. Taken together, the locale can be understood as a nexus for cultural interaction and trade, through the medium of gambling and games, on the natural frontier between peoples of the Interior Plateau and Northwest Plains.
