In design, a grid is a system for organizing layout. The layouts could be for print (like a book, magazine, or poster), or for screen (like a webpage, app, or other user interface). There are a lot of different types of grid, and they all serve different purposes. Here are some of the main examples: Baseline grid.

The grid system helps align page elements based on sequenced columns and rows. We use this column-based structure to place text, images, and functions in a consistent way throughout the design. Every element has its place that we can see instantly and reproduce elsewhere. Consider the grids we find in maps.
