Grigori Solovoyov, Siberian Lycanthrope goes to London to track down a Russian mobster who is stealing from the pack. Then Melisande Reule walks into his hotel bringing his woiif howling to the surface. He knows he has found his mate. But when she is targeted by a Russian assassin, Grigori must fight to keep her safe and at his side.

My dog is my mate and I am his mate. A uniquely Australian story of friendship, stunningly illustrated by Bronwyn Houston.

On the eve of their Silver Anniversary, Mary Gooch is waiting for her husband Jimmy -- still every inch the handsome star athlete he was in high school -- to come home. As night turns to day, it becomes frighteningly clear to Mary that he is gone. Through the years, disappointment and worry have brought Mary's life to a standstill, and she has let her universe shrink to the well-worn path from the bedroom to the refrigerator. But her husband's disappearance startles her out of her inertia, and she begins a desperate search. For the first time in her life, she boards a plane and flies across the country to find her lost husband. So used to hiding from the world, Mary finds that in the bright sun and broad vistas of California, she is forced to look up from the pavement. And what she finds fills her with inner strength she's never felt before. Through it all, Mary not only finds kindred spirits, but reunites with a more intimate stranger no longer sequestered by fear and habit: herself.

p.2; Belief that grease from a corpse rubbed over body transfers qualities of the dead warrior to person; p.3; Use of Kaolin clay to heal wounds; p.18; Description of a native buried alive in anthill as revenge murder; p.188; Great Barrier Reef natives custom of extracting oil phosphorus substance from fish to use as luminous body paint; p.211; Native camp described; Description of death-bone; contents of witch-doctors dilly-bag.

Orson Welles called her "The most exciting woman in the world." He was talking about the legendary Eartha Kitt -- the pioneer entertainer who broke race and sex barriers while shocking and seducing audiences around the world. In these pages, this stunning, sexy, fiercely independent woman relates the story of her extraordinary life. It's a life in which she was closely involved with personalities as varied as Sammy Davis, Jr., Orson Welles and her "soulmate," James Dean. Eartha Kitt has won awards and nominations for her work on stage and in film, both as an actress and a singer. She is acclaimed as one of the world's best all-around female entertainers. In I'm Still Here you'll find out how Eartha Kitt got where she is, and why she is very different and never dull. Book jacket.

Provides an overall introduction to the welding process, illustrating most of the common equipment and work techniques for both the home and shop welding.

In this paradigm-shattering book, leading behavioural economist and food psychologist Brian Wansink - dubbed the 'Sherlock Holmes of food' and the 'wizard of why' - offers a radical new philosophy for weight loss. The answer isn't to tell people what to do: it's to set up their living environments so that they will naturally lose weight. Using cutting-edge, never-before-seen research from his acclaimed Food and Brand Lab at Cornell University, Wansink reveals how innovative and inexpensive design changes - from home kitchens to restaurants, from grocery stores to schools and workplaces - can make it mindlessly easy for people to eat healthier and make it more profitable for the companies who sell the food. In Slim by Design, Wansink argues that the easiest, quickest and most natural way to work with human nature, not against it. He demonstrates how schools can nudge kids to take an apple instead of a cookie, how restaurants can increase profits by selling half-size portions, how supermarkets can double the amount of fruits and vegetables they sell, and how anyone can cut plate refills at home by more than a third. Interweaving drawings, charts, floor plans and scorecards with new scientific studies and compelling insights that will make you view your surroundings in an entirely fresh way, this entertaining, eye-opening book offers practical solutions for changing your everyday environment to make you, your family and even your community slim by design.

'When my legs went from underneath me and my breath stopped coming, just minutes before we were due to go live on The Voice, I knew this was panic at its worst. Yet in the midst of the madness, something became clear. If I got through this, the secret I had guarded for years with all my life could not remain secret for much longer ...' In his book, Niall Breslin speaks openly about living with depression and anxiety, and his crippling journey to finally acknowledging 'Jeffrey' - the name he chose for it - years after he took the decision to conceal his growing mental health issues from the world, at age 15. Told with raw honesty, it is a story of the demons that lay beneath outward success, and how they impacted on his career in sports and later music, as he coped with a condition that at times seemed hell bent on wrecking everything in its wake. It is also the story of a road to reconciliation with brokenness - beginning after a massive panic attack before a live TV appearance in 2012 - leading to brighter horizons. Me and My Mate Jeffrey is an essential book for anyone who knows what it is to feel alone, and who doesn't know how to ask for help - or anyone who wants to better understand that journey.

Are rooms of your house uncomfortable or unusable at different times of the year? Is your home drafty in winter? Do you get hit with a wave of heat walking upstairs in summer? Are mold or pests frequent problems in your home? Do you get big icicles in winter? Do you suspect your home is making you sick? Do you sleep better out of your house? Do you have a damp, dank basement? How about air quality problems like dust or odors? Are you ready to solve those problems? Then this book is for you. Before you can solve a problem, you need to understand what is causing the problem. This book explains how your home actually works so you can address root causes, not symptoms. We've seen far too many folks waste thousands of dollars addressing the wrong problem. Armed with this book, you can find the right pros to solve problems, understand if the work was done right, and even DIY many things yourself. This is the book I wish I had when I entered the Home Performance eld. It connects theory to action and shows real world examples of work being done and the results achieved. It assumes you're a building science novice as well as smart and willing to learn. You'll learn about how your home works, what to look for in a new heating and cooling (HVAC) system, what kinds of insulation work best and why, how to choose and install the right bath fan, and more. Everything in this book is backed up by field experience, data, and an overwhelming passion to do things right the first time.
