SAS Help Center: Introduction to the Macro Facility

In this module we discuss the first of the two special characters - the ampersand (&). When the SAS®Supervisor sees an ampersand followed by a non-blank character, the macro facility is triggered. In turn, the macro facility, determines the value for the macro variable and passes the value back on to the input stack.

Introduction to the SAS® Macro Language

An Introduction to the SAS® Macro Facility Amadeus Software Limited ABSTRACT The macro facility in the SAS System gives you extra functionality, more programming tools and a high level language for controlling Data Steps and Proc Steps. With the macro facility, you can pass values from step to step in normal SAS code, you can create bundles of SAS

An Introduction to the SAS® Macro Facility Amadeus ...

Macros can help in several ways. First, with macros you can make one small change in your program and have SAS echo that change throughout your program. Second, macros can allow you to write a piece of code and use it over and over again in the same program or in different programs.

243-29: SAS Macro Programming for Beginners

Macro variables are tools that enable you to dynamically modify the text in a SAS program through symbolic substitution. You can assign large or small amounts of text to macro variables, and after that, you can use that text by simply referencing the variable that contains it. Macro variable values have a maximum length of 65,534 characters.

Introduction to Macro Variables - SAS Support

dynamically modify text in a program.

Introduction - SAS Macro Facility | Coursera

SAS has a powerful programming feature called Macros which allows us to avoid repetitive sections of code and to use them again and again when needed. It also helps create dynamic variables within the code that can take different values for different run instances of the same code.

SAS - Macros - Tutorialspoint

Introduction to the %PUT Macro Statement; Example: Writing Messages to the Log; Default Output to the SAS Log. The previous sample logs show the information that appears in the log by default. You can also write to the log by using the PUT statement or the LIST statement within a DATA step. You can also use the %PUT macro statement anywhere in your program.

SAS Help Center: Writing to the SAS Log

SAS Macros are typically considered as part of advance SAS Programming and are used widely in reporting, data manipulation and automation of SAS programs. They do not help to reduce the time of execution, but instead, they reduce repetition of similar steps in your program and enhance the readability of Programs.

SAS Macros For Faster Data Manipulation Complete Tutorial

9.

- Whether automatic or user-defined, a macro variable is independent of a SAS data set and contains one text string value that remains constant until you change it.

SAS Macros - SlideShare

Introduction to the SAS/C® Library Commonly Used Functions This book describes the most commonly used functions in the SAS/C library. Chapter 2, "Function Categories," itemizes the functions by the following category: character type macros and functions string utility functions mathematical functions varying-length argument list functions
