Inside the KTM WP TRAX Shock
The TRAX unit is a very compact system in the bottom mounting fork of the shock, which significantly improves the grip of the rear wheel. This system has been successfully implemented by the Factory Racing department and many World Championship titles prove how effective it is.

WP Suspension | Technical Solution Suspension | WP ...
The Trax shock is firmer so there is less wallow in the rear end when accelerating, so the rear of the KTM tracks straighter. !Balanced! is a great word to describe both ends of the KTM 450 SX-F Factory Edition now (with the cone valve fork and Trax shock). I have the Trax system turned !off! for my setting as I felt like it had more of a dead feeling (which is a feeling that I like ...
