Introduces the nature of law and legal reasoning for anyone beginning serious legal training or study. Starting with the English legal system and constitutional law, Mcleod moves on to case law and precedent, statute law and interpretation including EC law as it arises.

This self-contained study and foundation book for legal training deals with how the course of law (both English and European Community) resolves the uncertainties that arise within the law, the basis of legal reasoning, and the nature of law itself.

Master content. In addition to more conventional sources, writers as varied as Jonathan Swift, Alexander Pope and T. S. Eliot are cited. This is an ideal course companion for both law undergraduate and GDL/CPE students. Includes end of chapter summaries and self-test exercises.

Studying Law introduces students to the fundamental legal skills that they will need to successfully study the subject, such as case analysis, legislative interpretation, problem solving and essay writing, and to the core Law subjects themselves and the distinctions between them.

Nobody's Law shows how people – who are disappointed, disenchanted,

and outraged about the justice system – gradually move away from law. Using detailed case studies and combining different theoretical perspectives, this book explores the legal consciousness of ordinary people, businessmen, and street-level bureaucrats in the Netherlands. The empirical research in this study tells an original and alternative narrative about the role of law in everyday life. While previous studies emphasize the law's hegemony and argue that it's 'all over', Hertogh shows that legal proliferation makes it harder for people to know, and subsequently identify with, the law. As a result, official law has become increasingly remote and irrelevant to many people. The central finding presented in this highly topical text is that these developments signal a process of 'legal alienation'— a

gradual and mundane process with potentially serious consequences for the legitimacy of law. A timely and original study, this book will be of particular interest to scholars in the fields of law and society, socio-legal studies and legal theory.

Sixty years after its invention, the operational system of the European Union remains little-understood. The 'Community Method' provides a comprehensive empirical analysis of the functioning and achievements of the EU.

Addresses a particular set of analytical problems and uses these problems to explore issues of ethnographic technique, research methodology, and the theoretical underpinnings of ethnographic legal studies. Subjects explored include the relationship between legal and feminist scholarship, between law and the media, law and globalization, and the usefulness of a wide variety of research techniques: comparative, linguistic, life-history, interview, and archival. This volume will serve as a guide for students who are designing their own research projects, for scholars who are newly exploring the possibilities of ethnographic research, and for experienced ethnographers who are engaged with methodological issues in light of current theoretical developments. The book will be
