Engine production for the typical car manufactured today is a study in mass production. Benefits in the manufacturing process for the manufacturer often run counter to the interests of the end user. What speeds up production and saves manufacturing costs results in an engine that is made to fall within a wide set of standards and specifications, often not optimized to meet the original design. In short, cheap and fast engine production results in a sloppy final product. Of course, this is not what enthusiasts want out of their engines. To maximize the performance of any engine, it must be balanced and blueprinted to the exact tolerances that the factory should have adhered to in the first place. Four cylinder, V-8, American or import, the performance of all engines is greatly improved by balancing and blueprinting. Dedicated enthusiasts and professional racers balance and blueprint their engines because the engines will produce more horsepower and torque, more efficiently use fuel, run cooler and last longer. In this book, expert engine builder and veteran author Mike Mavrigian explains and illustrates the most discriminating engine building techniques and perform detailed procedures, so the engine is perfectly balanced, matched, and optimized. Balancing and blueprinting is a time consuming and exacting process, but the investment in time pays off with superior performance. Through the process, you carefully measure, adjust, machine and fit each part together with precision tolerances, optimizing the design and maximizing performance. The book covers the block, crankshaft, connecting rods, pistons, cylinder heads, intake manifolds, camshaft, measuring tools and final assembly techniques. For more than 50 years, balancing and blueprinting has been an accepted and common practice for maximi

What could possibly go wrong in paradise? Tired of mortgage payments, thirty-something Andrew and Gwynn sold nearly everything they owned but their Siamese cat and escaped their humdrum nine-to-five existence for life in paradise—a tiny island in one of the remotest spots on Earth: the Okavango Delta in Botswana. Woefully inexperienced, they took control of a luxury game lodge that catered to the likes of French aristocrats, Hollywood directors, Mafia lawyers, and the captain of the England cricket team. Not forgetting the hippos who liked to crash cocktail hour. Trouble soon followed as the reality of running a hotel on an island accessible only by boat or plane burst upon them. Andrew and Gwynn learned it's one thing for guests to wake up with gentle giraffes outside their windows, but it's quite another to keep them safe from poisonous snakes, temperamental elephants, and a hyena with a taste for plastic. All that was child's play compared to figuring out how to feed their guests when a 'quick run' to the grocery store required a plane, a bush pilot, and moderate risk to life, limb, and property. By turns funny, touching, and suspenseful, Torn Trousers is a real modern fairytale about getting exactly what you wished for...and then having to live with it. Scroll up and buy to escape to Africa today!

The only biography of its kind, Lincolnomics narrates The Great Emancipator's untold legacy as The Great Builder of American infrastructure—developer of an economic ladder to democracy through national transportation, public education, and market access Lincoln's view of the right to fulfill one's economic destiny was at the core of his governing philosophy—but he knew no one could climb that ladder without strong federal support. Some of his most enduring policies came to him before the Civil War, visions of a country linked by railroads running ocean to ocean, canals turning small towns into bustling cities, public works bridging farmers to market. Expertly appraising the foundational ideas and policies on infrastructure that America's sixteenth president rooted in society, John F. Wasik tracks Lincoln from his time in the 1830s as a young Illinois state legislator pushing internal improvements; through his work as a lawyer representing the Illinois Central Railroad in the 1840s; to his presidential fight for the Transcontinental Railroad; and his support of land-grant colleges that educated a nation. To Lincoln, infrastructure meant more than the roads, bridges, and canals he shepherded as a lawyer and a public servant. These brick-and-mortar developments were essential to a nation's lifting citizens above poverty and its isolating origins. Lincolnomics reviews the disremembered history of how Lincoln paved the way for Eisenhower's interstate highways and FDR's social amenities. With an afterword addressing the failure of American infrastructure during the COVID-19 pandemic, and how Lincoln's policies provide a guide to the future, Lincolnomics makes the case for the man nicknamed "The Rail Splitter" as the Presidency's greatest builder.

The incredible true story of Tiger Woods's dramatic comeback following his humbling and very public personal, physical, and professional setbacks. One publicly imploded marriage. Two car accidents. Eight surgeries. And now, a miracle of hard work and storied talent: five Masters wins. Once hailed as "the greatest closer in history" before he fell further than any beloved athlete in America's memory, Tiger swung at the world's wildest expectations and beat the skeptics with his April 2019 Masters championship. Roaring Back traces his road to Augusta and the improbable, phenomenal comeback of one of the greatest golfers in history. New York Times–bestselling author Curt Sampson details the highs and lows of Woods's career in three gripping acts. From his startling loss at the 2009 PGA Championship, detrimental obsession with his swing, and that infamous night involving an ex-wife and a nine-iron to adoring fans and lucrative sponsors turning their backs, exclusive interviews with past instructors and PGA tour peers, and an arrest complete with a toxicology report . . . finally to Tiger coming from behind for his fifth green jacket as the crowd rumbled in Georgia, and how his comeback rivals those of the most dramatic in his sport. Sampson also places Woods's defeats and triumphs in the context of historic comebacks by other notable golfers like Ben Hogan, Skip Alexander, Aaron Siltan, and Charlie Beljan, finding the forty-three-year-old alone on the green for his trajectory of victory against all odds. As this enthralling book reveals, Tiger never doubted the perseverance of the winner in the mirror. "Sampson admirably details all the highs and lows." —Jim Nantz, CBS Sports
