Oil Painting Color Mixing
Guide

Color Mixing Guide list of oil paints. Here is your color mixing guide list of paints so far: My prepared black will have 2 parts Ivory or Mars Black, 1 part Burnt Umber, and 1/8 part Prussian Blue. You can experiment with making a very deep rich black using just Prussian blue and burnt umber. And it will dry faster than when using Ivory Black.

Color Mixing Guide - painting-ideas-and-techniques.com
The key to mixing color is understanding the various aspects that make up any given shade: hue, chroma, and value. Put simply, the hue is what a layman might call the color itself; the chroma is the degree of saturation, and the value is the degree of lightness or darkness.

side of the color you want to make that color. To make tints, you make pure versions of basic hues and then add white to them. You make shades by adding black or complementary hues to the pure hues. To those shade mixtures, you add white to make tones. As you add white, black, and complementary colors to your pure hues, you change their values and their intensities in very specific ways. Complementary hues are directly across from each other on the color wheel.

Acces PDF Oil Painting Color Mixing Guide

Beginning with the base middle green paint, modify the hue and temperature with a yellow (to make a lighter, warmer, more yellow green) or blue (to make a darker, cooler, more bluish-green) paint. Second, modify the saturation with any warming or neutralising colour from orange to violet (it usually takes a very small amount to start dulling or desaturating the colour).

Oil Painting Tips -
Pinterest

If you want to preserve the clarity and vibrancy of your skin tones, try to limit each color you mix to no more than three pigments at a time. For example, if you're mixing a bright skin tone to represent an area of flesh in direct sunlight, try a mixture of Yellow Ochre, Flake White and just a touch of Cadmium Orange.
