OSHA has revised its National Emphasis Program (NEP) for COVID-19. The agency launched the NEP on March 12, 2021, to focus on companies that put the largest number of workers at serious risk of ...

Recently, several academic studies have asserted varying degrees of under-recording of workplace injuries and illnesses on the OSHA Form 300; (e.g., Boden L.I., Ozonoff A. Capture-Recapture Estimates of Nonfatal Workplace Injuries and Illnesses, 2008 and Rosenman K.D. How Much Work-Related Injury and Illness is Missed By the Current National Surveillance System, 2006). At the request of the Senate Committee on Health, Education, Labor and Pensions and the House Committee on Education and Labor, the Government Accountability Office (GAO) initiated a study on the accuracy of employer injury and illness records. In an effort

to identify and correct under-recorded and incorrectly recorded cases and to work cooperatively with the GAO, OSHA initiated this NEP. This NEP also complements the Bureau of Labor Statistics' efforts to investigate factors accounting for differences in the number of workplace injuries and illnesses estimated by the BLS and other data sources. OSHA postulates a likely area where under-recorded injuries and illnesses may exist is in establishments operating in historically high rate industries and reporting injury and illness rates slightly lower than the cut-off rates used by OSHA to compile its primary inspection targeting list under the Site-Specific Targeting (SST) program. This NEP is one component of OSHA's effort to address the issue of inaccurate recording of occupational injuries and illnesses. In addition to this NEP, OSHA is addressing the issue through comprehensive training of its compliance staff to identify and correct violations of the recordkeeping regulation. OSHA will also develop other enforcement and quality assurance programs to address the recordkeeping issue in establishments and industries outside the scope of this NEP (e.g., the construction industry, Partnerships, VPP and SHARP establishments). The industry scope of the NEP is expanded to include industries listed on BLS table SNR02 for calendar years 2007 and 2008. The focus of the NEP will be on manufacturing industries. (see Appendix A) The deletion criterion for establishments with recalculated DART rates greater than 4.2 has been removed. The injury and illness rate criterion for establishments in scope of the NEP is changed from a DART rate of 4.2 or less to a DART rate greater than 4.2 and less than 8.0. CY 2008 ODI data is used for targeting list selection. The period of records review is changed to focus on CY 2008 and CY 2009 records.

OSHA's mission is to assure the safety and health of America's working men and women by promulgating and enforcing standards and regulations; providing training, outreach, and education; establishing partnerships; and encouraging continual improvement in workplace safety and health as well as the development of comprehensive safety and health management systems. Effective and efficient use of resources requires careful, flexible planning. In this way, the overall goal of hazard abatement and employee protection is best served. This Instruction establishes a Safety and Health Management System (SHMS) for Occupational Safety and Health Administration (OSHA) employees. The Instruction also establishes safety and health programs as identified in subsequent chapters for Regional implementation. Employee participation is a key element of any successful SHMS. It is the intent of this program that all employees will participate in all aspects including reporting hazards, incidents, and injury/illness without fear of reprisal. The purpose of this Instruction is to define and implement a Field Safety and Health Management System (SHMS) and appropriate safety and health programs, as identified in the subsequent chapters, for OSHA. OSHA is responsible for ensuring that employees of the Agency have a safe and healthful workplace that complies with the Occupational Safety and Health Act and with OSHA standards. Establishing an effective SHMS appropriate to employees' varied work responsibilities and workplace conditions is also an essential strategy to eliminate/control hazards before they lead to fatalities, injuries and illnesses.

This Instruction cancels and replaces OSHA Instruction OSHA CSP 03-01-002. The purpose of the manual is to provide guidance concerning implementation of the Voluntary Protection Programs (VPP), including revised policies and procedures a) published as Federal Register Notice 68 FR 68475, December 8, 2003; b) affecting

VPP participants covered under the Process Safety Management (PSM) standard; and c) enabling OSHA to employ an alternative reapproval process, the Compressed Reapproval Process to Recognize Sustained Excellence (CRP), for qualifying VPP Star participants. Major Changes include: Benchmark Rates. This Instruction incorporates changes published in Federal Register Notice 68 FR 68475, December 8, 2003, that revised the benchmark injury and illness rates used within VPP. Process Safety Management. This Instruction modifies procedures for VPP applications, OSHA onsite evaluations, and annual participant self-evaluations for applicants/participants subject to OSHA's Process Safety Management (PSM) standard. Compressed Reapproval Process. This Instruction introduces an alternative onsite reapproval process for Star participants who have demonstrated sustained excellence in safety and health systems management. Other. This Instruction removes template letters that OSHA periodically modifies and that are more appropriately disseminated through other means. It includes changes in the VPP recognition process. It also removes temporary instructions no longer applicable, and references to specific VPP affiliates. Minor editorial changes improve readability.
