The fastest, funniest page-turner on the planet! This is the ultimate book for kids who love slick supercars, powerful monster trucks, and record-smashing speed machines. Buckle up — the only thing more exciting than reading this book about big and fast cars is sitting behind the wheel of one crossing the finish line at the Indy 500! Inside you'll find amazing color photos, mind-blowing facts, and answers to some very urgent questions, like: Do you know why the van was embarrassed around its friends? Because it had a little gas! Since the invention of the wheel, people have been building machines that go faster and faster and look cooler and cooler. The first cars went about 10 mph, now they easily break 200 mph — and some even drive themselves! Speaking of which, ever wonder whose fault it is if two self-driving cars get in an accident? Pick up this book and find out! Under the hood you'll discover: • Incredible auto-related facts like record setting rides (check out the 763 mph ThrustSSC rocket car!) and answers to seriously silly questions (How do race car drivers pee during a race?) • Many S.T.E.A.M. learning opportunities such as the science of how cars work and the history of cars from the Model T to electric cars to a Tesla in space! • Behind-the-scenes stories of people with great car-related jobs such as a Hot Wheels designer, the guy who created the Batmobile, a scientist who controls rovers on Mars, and of course, record-setting drivers like Danica Patrick, Alexander Rossi, Dale Earnhardt, Jr. and teen sensation Chloe Chambers. • Fun activities such as drawing lessons (create your own car cartoon character!) matching games, quizzes, plus tons of jokes. • Sneak peeks inside the garages of your favorite famous car-collection celebs like The Rock, Lady Gaga, Guy Fieri and other car-obsessives! The only thing readers need to drive Road & Track Crew Big & Fast Cars is a license for fun. So turn the key, step on the gas and let's go!

From dirt bikes and jet skis to weed wackers and snowblowers, machines powered by small gas engines have become a permanent—and loud—fixture in American culture. But fifty years of high-speed fun and pristine lawns have not come without cost. In the first comprehensive history of the small-bore engine and the technology it powers, Paul R. Josephson explores the political, environmental, and public health issues surrounding one of America's most dangerous pastimes. Each chapter tells the story of an ecosystem within the United States and the devices that wreak havoc on it—personal watercraft (PWCs) on inland lakes and rivers; all-terrain vehicles (ATVs) in deserts and forests; lawn mowers and leaf blowers in suburbia. In addition to environmental impacts, Josephson discusses the development and promotion of these technologies, the legal and regulatory efforts made to improve their safety and environmental soundness, and the role of owners' clubs in encouraging responsible operation. Synthesizing information from medical journals, recent environmental research, nongovernmental organizations, and manufacturers, Josephson's compelling history leads to one irrefutable conclusion: these machines cannot be operated without loss of life and loss of habitat.

One rickshaw. Two guys. Twelve days. 2300 km. India. Join two friends as they race across India competing against other teams in an Auto Rickshaw. Follow their adventure as the cross paths with monsoons, the police, multiple breakdowns and other unimaginable challenges.
