In this deceptively simple little book, Ms. England has made accessible for both professionals and the general public the theory linking neurochemical science to the behaviors and relational patterns observed in persons with addictions and those who love them. As a professional working with families ravaged by addiction, and as a member of Al-Anon seeking to grow and be a good steward of the life experiences that are mine, I am challenged by this book to seek ways to apply its techniques with clients and my own life...Ms. England's book reminds me in the particularly memorable way of any good story...that there is both danger and delight in this activity of living.

Smoke has come to the Cirque Magnifique. And Sasha Brown is sure it is her fault. Sasha has always loved the Cirque, a place filled with sequined costumes, dazzling spotlights, and magnificent tents. But when she starts fifth grade with the Islanders—the ordinary folk from the other side of the Island—for the first time, she's not so sure she wants to be a Cirque kid. She starts to question her home and her Cirque family. Is the magic real? Are the stories even true? As the bullying by the Island kids gets worse, swirling blue-gray Smoke appears. One night in the big tent, Sasha's dad performs, twisting his body through the air as the lights dance. Sasha is supposed to be helping, but instead she sits beneath the bleachers, seething. She has wished for the Smoke to come and make it all

disappear: the Cirque, her family, the Island with its mean Island kids. And the Smoke does come. As Sasha watches her dad, he flips and raises his arms out for the bar that is supposed to meet him, his bright grin confident and sure. But there is only air...and Smoke. Both of Sasha's parents disappear that night, and it's all Sasha's fault. What can she do but try and find them?

Tanya Huff's supernatural fantasy Smoke series, with a gothic twist • Mix of ghostly mystery, paranormal horror, and dark humor • Lambda Award nominated Fans of the X-Files and Twin Peaks will love acclaimed master of contemporary fantasy Tanya Huff's twisted version of vampires, wizards, and TV terror. When Tony Foster relocated to Vancouver with his vampire Henry Fitzroy, he knew it was his chance to get his act together. In an example of art echoing life, Tony landed a job as production assistant for the syndicated TV show Darkest Night, a series about a vampire detective. And except for his unrequited crush on the show's handsome costar, Lee Nicholas, Tony was pretty content. Until everything started to fall apart on the set. It began with shadows—shadows where they didn't belong, that almost had an existence of their own. Tony tried to ignore it—until he found Nikki Waugh's body, and felt the shadow's touch, and a stunt crash went wrong for no discernible reason—and Tony knew that he had to find out what was threatening everyone on the set.

The town of Wyse, set precisely on the border of England and Wales, is remarkable for one thing: it is the only remaining human town where magic works. When twelve-year-old Ava and her brother return to their birthplace of Wyse, they discover that their once magical town has been losing its charms under the control of Lord Skinner. Uncovering a working magic mirror, Ava opens an unauthorized link to the twinned town of Unwyse, where she meets Howell, one of the unlucky Fair Folk who is being pursued by the terrifying Mr Bones. Discovering that they are the joint guardians of a grumpy old book that can tell the future, the new friends are unexpectedly launched headlong into an adventure to uncover the mysterious link between Mr Bones and Lord Skinner, and to find out what's happening to the waning magic that connects their two worlds. From Claire Fayers, the critically acclaimed author of The Accidental Pirates series, comes Mirror Magic a magical adventure like no other!

An exploration of the world of magic that teaches the reader many tricks--including how better to understand the real world. Alex Stone--journalist and part-time conjurer--is here to amaze you. But first he had to amaze his fellow magicians. Fooling Houdini is his fascinating, revealing, and nailbiting account of his attempt to win the 23rd World Championships of Magic, the "Magic Olympics," the largest and most prestigious competition of its kind. Alex Stone managed to qualify for entry and began preparing to astonish people who astonish others for a living. It didn't help his nerves that he was placed on the bill straight after Canadian magician Shawn Farquhar, winner of more magic competitions than anyone in history. Stone's preparations and participation provide his readers with in-depth exploration of the world of magic, and magic's meaning. He spills many professional secrets, arguing that what is

important is to ask questions about what lies behind the tricks: how the mind perceives the world and parses everyday experience, about how the mind works--and why sometimes it doesn't, about why people need to believe. As we become more attuned to the limits of our own perception, we become better at distinguishing reality from illusion, at reading the angles and decoding the fine print, he says. We gain intuition and understanding into how people behave. We even learn ways to influence this behavior. This makes us less susceptible to all manner of deception. It is to gain and maintain this sixth sense that Alex Stone--a schoolboy prestidigitator--has continued performing magic well into adulthood. In *Fooling Houdini* he takes us into that other world, populated by truly astounding characters, and leaves us with a heightened sense of awareness about the supposedly real world.
