X. The Migration Period, also called the Barbarian Invasions or German: Völkerwanderung (wandering of the peoples), was a period of human migration that occurred roughly between 300 to 700 CE in Europe, marking the transition from Late Antiquity to the Early Middle Ages. These movements were catalyzed by profound changes within both the Roman Empire and the so-called 'barbarian frontier'.

The Migration Period was followed by the Viking Age. There are differences of opinion among historians as to the dates for the beginning and ending of the Migration Period. The beginning of the period is widely regarded as the invasion of Europe by the Huns from Asia in 375 and the ending with the conquest of Italy by the Lombards in 568, [3] but a more loosely set period is from as early as ...

The Age of Migration: International Population Movements in the Modern World: Authors: Stephen Castles, Hein de Haas, Mark J. Miller: Edition: 5, revised: Publisher: Palgrave Macmillan, 2013: ISBN:...

This leading text in the field provides a comprehensive assessment of the nature, extent and dimensions of international population movements and of their consequences. Thoroughly revised and updated, the 5th edition assesses the impact of the global economic crisis for migration and includes new material on climate change and migration.

Now with more balanced coverage of Western and non-Western regions, this leading text has been revised and updated with the latest theories, policy information, and interdisciplinary research. The book explores the causes, dynamics, and consequences of international population movements, as well as the experiences of migrants themselves. Chapters examine migration trends and patterns in all major world regions, how migration transforms both destination and origin societies, and the effects of migration and increasing ethnic diversity on national identity and politics. Useful pedagogical features include boxed case studies; extensive tables, graphs, and maps; end-of-chapter Guides to Further Reading; and a companion website with additional case studies, interactive flashcards, and other resources for students and instructors. --

In the context of the growing politicization of migration a debate has emerged in policy and academia on the need to develop global governance on migration to facilitate better inter-state cooperation. This book provides an introduction to the institutions, politics, and normative dimensions of different aspects of international migration

Greater mobility and migration have brought about unprecedented levels of diversity that are transforming communities across the Atlantic in fundamental ways, sparking uncertainty over who the "we" is in a society. As publics fear loss of their national identity and values, the need is greater than ever to reinforce the bonds that tie communities together. Yet, while a consensus may be emerging as to what has not worked well, little thought has been given to developing a new organizing principle for community cohesion. Such a vision needs to smooth divisions between immigration's "winners and losers," blunt extremism, and respond smartly to changing community and national identities. This volume will examine the lessons that can be drawn from various approaches to immigrant integration and managing diversity in North America and Europe. The book delivers recommendations on what policymakers must do to build and reinforce inclusiveness given the realities on each side of the Atlantic. It offers insights into the next generation of policies that can (re)build inclusive societies and bring immigrants and natives together in pursuit of shared futures.

Through an interdisciplinary analytic lens that combines debates emerged in the fields of international relations, political science and sociology, Valeria Bello reveals how transnational dynamics have increased extremism, prejudiced attitudes towards others and international xenophobia. Bello begins her analysis by tracing similarities between Europe today and Europe before World War II to explain why prejudice is a global security threat and why it is arising as a current global concern within International Organizations. In such a light, Bello shows how changes in the International System and the attack on the UN practice of Intercultural Dialogue have become sources of new perceived threats and the reasons for which new exclusionary patterns have arisen. She argues that both those outcomes have been exacerbating the perceived clash of civilizations and the root causes of different fashions of extremisms. Bello concludes by portraying alternative ways to deal with these instabilities through a partnership of the different stakeholders involved, including both state and non-state actors at global, regional, national and local levels. International Migration and International Security provides a unique crosscutting angle from which to analyze the current socio-political crisis connected to the theme of international migration that the world is currently witnessing. Bello expertly shows that different paths for the world are possible and suggest ways to further promote Global Human Security through local, national, regional and global practices of Intercultural Dialogue.

Since 2000, IOM has been producing world migration reports. The World Migration Report 2020, the tenth in the world migration report series, has been produced to contribute to increased understanding of migration throughout the world. This new edition presents key data and information on migration as well as thematic chapters on highly topical migration issues, and is structured to focus on two key contributions for readers: Part I: key information on migration and migrants (including migration-related statistics); and Part II: balanced, evidence-based analysis of complex and emerging migration issues.

Migration has assumed growing significance in the global development agenda as its potential for economic and social development is increasingly acknowledged. Within the Africa context, perceptions of migration as a negative phenomenon have shifted to recognition of its central role to Africa's transformation. Despite this shift, emerging migration dynamics have not been adequately contextualized and conceptualized, making it difficult to integrate migration into development planning processes. This book attempts to fill the gaps in migration knowledge production, particularly from the perspectives of researchers in the global south and more specifically from Ghana. The chapters provide multi disciplinary perspectives in the contemporary migration landscape in Ghana and Africa. Rather than focus on migration as a problem to be solved, the chapters explore migration as an intrinsic part of the broader processes of structural change in Ghana, which could create opportunities for development if properly harnessed. This reader is an essential resource for migration and development researchers, students, policy makers, practitioners and others interested in the field of development.

This proceedings book addresses the main issues of contemporary political geography and international relations, providing a platform for discussion and collaboration of experts in the fields of Political Geography, Geopolitics, International Relations, and International Law. Participants from all over the world consider the controversies and challenges posed by globalization, focusing, in particular, on the ideologies of globalization and regionalism, migration crises, prevention of ethnic conflicts, and measures to counteract racism, xenophobia, and extremism

In this third edition of Migration in World History, Patrick Manning presents an expanded and newly coherent view of migratory processes, conveying new research and interpretation. The engaging narrative shows the continuity of migratory processes from the time of foragers who settled the earth to farmers opening new fields and merchants linking purchasers everywhere. In the last thousand years, accumulation of wealth brought capitalism, industry, and the travels of free and slave migrants. In a contest of civilizational hierarchy and movements of emancipation, nations arose to replace empires, although conflicts within nations expelled refugees. The future of migration is now a serious concern. The new edition includes: An introduction to the migration theories that explain the shifting patterns of migration in early and recent times Quantification of changes in migration, including international migration, domestic urbanization, and growing refugee movements A new chapter tracing twenty-first-century migration and population from 2000 to 2050, showing how migrants escaping climate change will steadily outnumber refugees from other social conflicts While migration is often stressful, it contributes to diversity, exchanges, new perspectives, and innovations. This comprehensive and up-to-date view of migration will stimulate readers with interests in many fields.
