A collection of research papers on the BRICs phenomenon and its impact on the global economy. The Goldman Sachs Global Economics Department has recently released BRICS and Beyond. This book compiles our recent research on the BRICs—Brazil, Russia, India and China—and the changing nature of the global economy. It is now six years since we coined the term 'BRIC' in our Global Economics Paper, 'Building Better Global Economic BRICs', published on November 30, 2001.

The BRICS alliance seems to have yielded limited benefits for South Africa in terms of interest articulation in global economic governance beyond the rhetoric of reform and democratisation of global economic governance institutions. While elevating South Africa's voice in global economic governance debates, it has been difficult to identify tangible economic benefits flowing from South Africa's membership of BRICS outside of the normal bilateral economic engagement that South Africa has ...

Jim O'Neill, one of the most influential economists today, shares his insights on how and why he developed one of the most compelling economic concepts of our time in *The Growth Map*. 'O'Neill has redefined how investors and Western business leaders see the world. This book tells the unlikely story of how O'Neill developed this path-breaking idea . . . lively, powerful and highly accessible' Gillian Tett, *Financial Times* Ten years ago, Jim O'Neill predicted that globalization would help Brazil, Russia, India and China (the BRICs) - busy, ambitious countries full of raw materials - overtake the largest Western economies. With all four BRIC nations set to do just that, no other idea has proved as significant for the new century. But these changes have provoked business and political uncertainty and in *The Growth Map* O'Neill examines what is coming next. Can the BRICs sustain their exceptional growth? Which nations will come next? And what, for all of us, does the future hold? 'Goldman Sachs' rock star' *Business Week* 'Sharp, shrewd. Tells the big story of our time. The fundamental shift of economic power from the West' Niall Ferguson 'O'Neill has changed how the world thinks about economic growth - and how the BRICs think about themselves' Lloyd Blankfein, Chairman And Ceo, Goldman Sachs 'One of the most sought-after economic commentators on the planet' *Daily Telegraph* Jim O'Neill is Chairman of Goldman Sachs Asset Management. He joined Goldman Sachs in 1995, rising to chief economist, and in 2001 he led the team that conducted the original BRIC analysis. He is chairman of the charity SHINE, and a member of the boards of the UK Royal Economic Society, Itinera and Bruegel. He has a lifelong passion for Manchester United FC, and has served as a non-executive director of the club's board.

The world is in an era of great transformations. Globalization, transnational capitalism, September 11, the 2008 global financial crises, and the emergence of the 'second world' in general and the BRICS in particular are characterized by a diffusion of power away from the traditional North Western powers and towards the global South. Such great transformations have reshaped the terrain and parameters of social, economic and political relations both at the national and the global levels and have exerted pressure on the exiting international order in terms of both opportunities and constraints. This new era also urges the need for re-conceptualizing the changing world order especially with regard to one of the core conceptual categories and analytical apparatus in the studies of IR and IPE - hegemony. The world will witness a new era of interdependent hegemony, in which both the existing 'First World' and the emerging 'Second World' are intertwined in a constant process of shaping and reshaping the international order in the nexus of national interest, regional orientation, common economic and political agenda, political alliance and potential conflicts. This collection juxtaposes, from different perspectives and approaches, the discussion on the political economy of the emerging world order with a focus on the rising powers.

Recent 'great transformations' are characterized by a diffusion of power away from the traditional North Western powers and towards the global South. This volume suggests that the world will witness a new era of interdependent hegemony, in which both the existing 'First World' and the emerging 'Second World' are intertwined in a constant process of shaping and reshaping the international order in the nexus of national interest, regional orientation, common economic and political agenda, political alliance and potential conflicts. This collection juxtaposes, from different perspectives and approaches, the discussion on the political economy of the emerging world order with a focus on the rising powers.

At a time of historic shifts in the underlying dynamics of the world economy, not to mention great uncertainties hanging over the course of economic policy, Jim O'Neill provides a critical roadmap to understanding what really matters over the next several years and beyond. -- Jeffrey Garten, Juan Trippe Professor of International Trade and Finance; Former Undersecretary of Commerce for International Trade, Clinton Administration Jim O'Neill can claim credit for transforming a debate and coining a term that has entered our lexicon: BRIC (Brazil, Russia, India, China). Here he shares a range of insights as to why these large economies are not the powers of the future, but "the powers of the present." -- Linda Yueh, Chief Business Correspondent for BBC News In this physically slim but seriously thought-provoking book, Jim O'Neill suggests the key policy lessons of the success of the BRICs and other fast-growing emerging market and developing economies for the advanced countries. It is a subject we all need to understand, and this is a very good place to start. -- Stanley Fischer, former Governor of the Bank of Israel, former Number 2 at the International Monetary Fund, and former Chief Economist at the World Bank A demonstration of Jim O'Neill's mastery of smart economics and unwavering commitment to global development, this book

provides both food for thought and a way forward for policymakers worldwide. It is also a wake-up call for those in denial about the urgent need for the reform of institutions of global governance. -- Ngozi Okonjo-Iweal, Coordinating Minister for the Economy and Finance Minister Nigeria and former Managing Director of the World Bank

BRICs and Beyond is an international business executive text written especially for executive and MBA students. It is based on extensive consulting in emerging economies and several years of experience teaching executive MBA courses around the globe. The author has continually faced the problem that the available textbooks for teaching international business focused almost exclusively on examples of Western multinationals for case illustrations. In the process of preparing cases nearer to the emerging market she worked in, the author realized that the often fascinating, frequently insightful and always different approach to business illustrated by these cases should be required reading for MBA students in typical Western environments too. With its wide range of current case illustrations and concise summaries this is a new-generation text that will welcome today's MBA student to the wider world of 21st century international business. ". . . this book is needed not only because it looks at business from the BRICs points of view; it also looks at business from the point of view of tomorrow's business leaders and the challenges that they will have to cope with." --Professor Jonathan Gosling, Centre for Leadership Studies, and co-founder, The One-Planet MBA, the University of Exeter, UK ". . . Stephanie Jones advises Western businesses on doing business in emerging economies in a refreshingly straightforward manner, integrating in a novel way her three decades of global, practical experience with the daily barrage of reporting on the BRICs--distilling from these many lessons and principles. . ."--Extracted from the Foreword, by Professor Wim Naudé, Director of Research, Maastricht School of Management

Bringing together distinguished scholars from BRICS nations and those with deep interest and knowledge of these emerging powers, this collection makes a significant intervention in the ongoing debates about comparative communication research and thus contributes to the further internationalization of media and communication studies. The unprecedented expansion of online media in the world's major non-Western nations, exemplified by BRICS (Brazil, Russia, India, China and South Africa) is transforming global communication. Despite their differences and divergences on key policy issues, what unites these five nations, representing more than 20 per cent of the global GDP, is the scale and scope of change in their communication environment, triggered by a multilingual, mobile Internet. The resulting networked and digitized communication ecology has reoriented international media and communication flows. Evaluating the implications of globalization of BRICS media on the reshaping of international communication, the book frames this within the contexts of theory-building on media and communication systems, soft power discourses and communication practices, including in cyberspace. Adopting a critical approach in analysing BRICS communication strategies and their effectiveness, the book assesses the role of the BRICS nations in reframing a global communication order for a 'post-American world'. This critical volume of essays is ideal for students, teachers and researchers in journalism, media, politics, sociology, international relations, area studies and cultural studies.

The transformation of the BRIC acronym from an investment term into a household name of international politics and into a semi-institutionalized political outfit (called BRICS, with a capital 'S'), is one of the defining developments in international politics in the past decades. While the concept is now commonly used in the general public debate and international media, there has not yet been a comprehensive and scholarly analysis of the history of the BRICS term. The BRICS and the Future of Global Order, Second Edition offers a definitive reference history of the BRICS as a term and as an institution--a chronological narrative and analytical account of the BRICS concept from its inception in 2001 to the political grouping it is today. In addition, it analyzes what the rise of powers like Brazil, Russia, India, China, and South Africa means for the future of global order. Will the BRICS countries seek to establish a parallel system with its own distinctive set of rules, institutions, and currencies of power, rejecting key tenets of liberal internationalism, or will they seek to embrace the rules and norms that define today's Western-led order?

This book examines the direction of the BRICS association. Beginning with historical analyses of the broader Global South and the fundamental composition of the BRICS countries and then moving on to present trends, The BRICS Order evaluates the variables that will influence the association's future. While the BRICS as a forum emerged as a result of the visible fragmentation of the post-1945 world order, it itself remains dogged by issues emanating from internal divergences among member states and from external factors. The contributors interrogate the extent to which this formation of "emerging economies" is indicative of a challenge to the West, or in fact a complimentary relation. Integral to these studies - which encompass examinations of such diverse areas as governance systems, issues in bilateral relations, security threats, multilateral institution building, the transnational creation and dissemination of knowledge, and technological innovation - are patterns of convergence and divergence which render the countries not a formal alliance, but as signifiers of a multilateral future in which the West is itself to become more heterogeneous and thus become occasionally complemented depending on the vacillating consensus within the BRICS association and on the interests of the BRICS countries at different points in time.

The book critically analyzes the ongoing changes in the regional, intra-regional, and global dynamics of cooperation, from a multi-disciplinary and pluralist perspective. It is based on the insight that in a post-hegemonic world the formation of regions and the process of globalization can be largely disconnected from the orbit of the US, and that a plurality of power and worldviews has replaced US hegemony. In spite of these changes, most existing analyses of current changes in the world order still rely upon Western-centered approaches, and Westphalian thinking. Against this backdrop, the book proposes to advance a truly global IR understanding of the post-hegemonic world, and weaves together the pluralist and multi-disciplinary perspectives of scholars located all around the world.
