homesteading all over the world.

I loved reading about the creativity and resilience of farmers of color as they work in community to fight exploitation, marginalization and bring good food to families and communities of color.

The Color of Food: Stories of Race, Resilience and Farming ...

Author, photographer, and biracial farmer Natasha Bowens' quest to explore her own roots in the soil leads her to unearth a larger story, weaving together the seemingly forgotten history of agriculture for people of color, the issues they face today, and the culture and resilience they bring to food and farming. The Color of Food teaches us that the food and farm movement is about more than buying local and protecting our soil. It is about preserving culture and community,

The Color of Food: America's Invisible Farmers. At the height of Black farming in the U.S., a million farmers owned almost 17 million acres of land. Between 1920 and 1996, however, Black land ownership dropped by 70 percent and in 2012, there were only 44,000 Black farmers in the nation. Thanks to evidence uncovered in a landmark lawsuit *Pigford v.*
