Ok, I admit this sounds gross but I promise you that this type of free-cycling can be done without dragging someone else's bedbugs into your house and can result in a good thing. Like really good, because old chairs are usually way better built and much nicer in size -namely smaller.

The Shingled House

Imposing yet pleasing rooflines, rampant linearity intersecting at unexpected angles, wood shakes and siding combined with stone, metal, and brick. The final form seems hewn from a magically fluid new element. Such is the "new" shingled house as interpreted by the architecture trio of Ike, Kligerman, and Barkley. "New", indeed.

The architectural style of the classic American summer, the shingled house can suggest the beach, the countryside, the mountains, and even the city. AD100 architects Ike Kligerman Barkley, one of the most successful firms practicing in a traditional style today, presents 14 houses that celebrate the simple wood shingle's infinite flexibility—ranging from richly historic to sculptural and experimental. The New Shingled House includes examples throughout the fabled seaside resorts of New England—Martha's Vineyard, Block Island, and the Hamptons—as well as houses in California's Bay Area and Point Loma, on a pristine mountain lake in South Carolina, and a Scandinavian influenced family residence in Connecticut. All are characterized by a sense of graciousness and generosity that makes them unique spaces for the owners and enviable spaces for readers. The versatility of the shingle style allows the designers to explore formal ideas and to respond to client preferences and taste. The houses thus achieve the architects' fundamental goal: when their clients enter their new house for the first time, they should feel as though they have always lived there. This stunning visual presentation features new photography by noted interiors photographer William Waldron, who has captured the graciousness and generosity of the elegant interiors and welcoming porches and terraces that make these houses so inviting and timeless.

Shingle Style flourished in the Gilded Age environs of Newport, Rhode Island, during the 1880s. The setting for the film "High Society," and the location of John F. Kennedy's wedding, it continues to enchant residents and visitors alike with an unparalleled concentration of carefully preserved architecture. With asymmetrical wood frames and shingled stories set dramatically on stone foundations, these romantic homes were intended to blend in with the surrounding landscape, creating a unified look, while at the same time incorporating fantastical elements such as gables, brick and stone chimneys, bands of small-paned windows, turrets, columns, and pediments. Recently, American vernacular architecture has witnessed a renaissance, as impressive new Shingle Style homes are built alongside those that have presided along the rugged Rhode Island coastline for more than a century. This collection of 15 homes, showcased with full-color photos and evocative text, represents the best of Newport Shingle Style – now and then.

Each year the pristine beaches, lush pine forests, and picturesque New England towns of Martha's Vineyard draw tens of thousands of admirers to this beautiful island. Some of these visitors have become part-time residents, building contemporary homes alongside the traditional Victorian cottages, sea captains' mansions, and colonial farmhouses that comprise the island's cultural and architectural heritage. Rarely does one find such a concentration of outstanding contemporary design. Authors Keith Moskow and Robert Linn expand their 2005 survey of Vineyard residential design to present twenty-five new houses that extend the traditional Vineyard vernacular of shingled houses and cottages. Each of the architects has described the goals for the project and the source of the design. Some reference nautical themes, others environmental concerns, and still others appropriateness of materials and scale. A significant number rely on a plan strategy based on a series of pavilions to minimize intrusion in the landscape while still taking advantage of views and prevailing breezes. What links the houses is that they are all built to stand the test of time in the sometimes extreme marine environment and they respectfully break with tradition.

Today the excitement in architecture derives from the tension between the need for privacy and the impulse toward community. This unique survey of buildings and interiors captures the multilayered experience that is engaged whenever we look out of—or into—a work of architecture. Immaterial World examines the built environment as a reflection of the terrors and pleasures of exposure, information overload, and abundance of every sort. Twenty-five projects from around the world by such well-known architects as Diller Scofidio + Renfro, Morphosis, Christian de Portzamparc, Renzo Piano, and many others, are presented. These works range from complete transparency to bunkerlike opacity, depending upon who's doing the looking and who or what is being seen.

John Ike, Thomas Kligerman, and Joel Barkley speak architectural languages of the past with a sure command of grammar and syntax and a rich vocabulary

of form and detail. As designers they build upon what went before to extend the trajectory of architecture. –Robert A. M. Stern The signature residential works of Ike Kligerman Barkley Architects bring together historic precedent and contemporary taste with a considered approach to detail, material, and craft. Based in New York and San Francisco, the firm incorporates elements from the great eras and the great practitioners of architecture: the Arts and Crafts movement, Art Deco, Modernism, Colonial Revival, Shingle Style; Sir Edwin Lutyens, Harrie T. Lindeberg, George Howe, Bernard Maybeck, and McKim, Mead & White. Yet ever present is a keen awareness of the modern world, notably in an emphasis on natural light and open views and a responsiveness to the unique qualities of a site. The twenty-one houses and apartments in this lavishly illustrated volume, the first published on Ike Kligerman Barkley, represent the remarkable breadth of the practice. A cottage in Michigan reveals a comprehensive investigation of craft traditions, while a Hawaiian beach retreat explores the vernacular Polynesian long-house. A sleek Manhattan loft evokes the industrial history of its neighborhood, while an oceanfront villa recalls Carlo Scarpa's interweaving of past and present. Unusual, even unlikely combinations—an English-influenced Shingle Style house the firm terms “Shinglish,” a Virginia horse farm that draws equally on classical formality and easy rusticity—embody the firm's sophisticated balance between historic model and modern refinement. Just as novelists and filmmakers gravitate toward genres that suit the themes they choose to explore, we look for the historic style that represents the best vehicle for the architectural story we wish to tell. –Ike Kligerman Barkley Architects

From coastal retreats to city streets, the modern shingle style home offers residents a wide range of specialized features, including the ability to reconnect with nature, energy efficiency, and improved indoor environmental quality. Through nearly 300 photos of 40 North American homes, this study offers historical perspectives and modern interpretations of this unique American movement. Be inspired by the creative ways that stone, wood, and natural light are used to provide comfortable and sustainable living quarters that accompany the natural elements of these properties.

- Presents stories behind the images including exclusive artwork and previously unseen images- Endorsed by celebrated interior designer, Kelly Wearstler and Amy Astley, the editor of Architectural Digest- QR codes link images to the sites of buildings and evolving video content This book is a celebration of the power of the mobile phone camera combined with Tom Kligerman's unique eye. Tom is a New York architect who adores travel and the different cultures of the world, recording vibrant details and evocative scenes on his iPhone as he journeys from India to New Mexico, from Beaux-Arts monuments to rustic barns, from ocean to mountaintop. The images have been curated into dynamic pairs that spark a conversation about the world and the different ways of seeing it. They are accompanied by Tom's reflections, and those of his Instagram followers, in a series of captions, comments and mini essays. This book is a child of the pandemic, a time when people could only dream of traveling or relive past experiences, as Tom has done, from the image banks on their mobile devices. It rejoices in both the potential of new media and the physical pleasure given by a beautifully made and structured book. It allows readers a moment of pause and reflection, so necessary if we are not to be lost in the digital feed.

Howard Van Doren Shaw designed stately country houses in and around Chicago—from affluent Lake Forest, Illinois, and Lake Geneva, Wisconsin, to Iowa, Minnesota, Ohio, and Indiana—from 1894 to 1926, a period in American architecture that spanned the Gilded Age, the adoption of Beaux-Arts classicism as the ideal for civic architecture, the invention of the skyscraper, and the beginning of modernism. Born in 1869, he worked for the leading industrialists of that period, including Reuben H. Donnelley of printing fame, newspaper giant Joseph Medill Patterson, Edward Forster Swift, the meatpacking king, and Edward L. Ryerson of Ryerson Steel. A contemporary of Frank Lloyd Wright, Shaw explored many of the same ideas as the Prairie School Architects within the forms of traditional architecture. Though he was recognized as one of the leading country house architects of the early twentieth century, his name was largely forgotten after his death. Like many traditional architects practicing today, Shaw was skilled at adapting historic precedents to suit contemporary living, in particular the easy flow of interior space that became a design hallmark of the period for traditionalists and modernists alike. For the new and fashionable suburb of Lake Forest, Shaw created Market Square, the town center, which was lauded for its design as both a unique town green and the first American shopping center designed to accommodate automobiles. This timely reappraisal of Howard Van Doren Shaw's work features many previously unpublished images from the Shaw Archive in the Burnham and Ryerson Library at the Art Institute of Chicago and the Chicago History Museum, rare construction drawings, and new color photography as well as a catalogue of Shaw's residential work. His legacy includes substantial houses in prosperous communities, many of which are still standing—including Ragdale, once Shaw's own summer house in Lake Forest, now home to the prestigious artists' community; the Becker Estate on Chicago's North Shore; and The Hermann House overlooking Lake Michigan.

Romantic seaside houses in the beloved Shingle Style, from Maine to Montauk. This book will delight and inspire readers with its luxurious treatment of homes in this beloved architectural style, which has become an expression of the romantic longing for a life by the sea. Featuring all-new photography taken especially for the book, it looks at both the historic and new Shingle Style houses. The Shingle Style is one of the few purely American genres of architecture and was closely linked to the Aesthetic and the Arts and Crafts movements. Prominent architects, including H. H. Richardson, William Ralph Emerson, and Frank Lloyd Wright, were influenced by the style and contributed to its milieu. Architects and architectural movements, including postmodernism, have continued to be influenced by this style. This volume begins with a well-documented history and then considers some of the more

exemplary houses of the style in its original and modern manifestations. Some of the more notable homes featured are McKim, Mead & White's Ochre Point in Newport, Rhode Island, the Quackenbush House in East Hampton, and Grey Gardens, the famously ramshackle residence of Edith Bouvier Beale and her daughter "Little Edie"—the eccentric aunt and first cousin of Jacqueline Kennedy Onassis—, as well as contemporary manifestations of the style, such as the Robert A.M. Stern-designed Chilmark Residence, in Martha's Vineyard, and Shope Reno Wharton's Black Watch, in Jamestown, Rhode Island.

An unexpected summer fling could turn out to be the best decision she's ever made! After her father loses the family fortune in an insider-trading scheme, single mom Parker Welles is faced with some hard decisions. First order of business: go to Gideon's Cove, Maine, to sell the only thing she now owns—a decrepit house in need of some serious flipping. When her father's wingman, James Cahill, asks to go with her, she's not thrilled...even if he is fairly gorgeous and knows his way around a toolbox. Second on Parker's list: find a nice man to have a no-strings-attached summer fling with...if that's even possible in a small town. Having to fend for herself financially for the first time in her life, Parker signs on as a florist's assistant and starts to find out who she really is. Maybe James isn't the boring lawyer she always thought he was. And maybe the house isn't the only thing that needs a little TLC. Previously published.
