Theory logically consists of concepts, assumptions and generalization. The major function of theory is to describe, explain, and predict behavior. Theory is heuristic for it stimulates and guides the further development of knowledge.

Theories of State Functions. The final purpose of political philosophy is to determine the essential nature of political authority, the relation in which the individual stands to the state, and the relation in which states stand to one another. Accordingly, theories of state function cannot be entirely separated from

There is a sense in which Wright's theory is not an "analysis" of function in the sense that earlier accounts are. Earlier writers were largely concerned with how it can ever be that something's existence can be inferred from its function, given that other things could often have done the same job (Hempel 1965).
